

# The Clockwork Angel

By: Cassandra Clare

Have you ever heard of a Shadowhunter? The chances are that you have not. Shadowhunters are half angel and half human warriors. They are sworn to protect the human race from demons and downworlders. Tessa Gray thought she was just a normal human for the first sixteen years of her life. When her Aunt Harriet dies and her brother Nate is living in London, Tessa starts the journey of a lifetime. When Tessa arrives in London she is kidnapped and all she wants is her brother and for her life to go back to the way it was before. The people who took her, the Dark sisters, have her brother too and threatened to hurt him if she did not cooperate. She finds out she has odd powers that allow her to change into other people and access their thoughts. One day a handsome Shadowhunter named Will swoops in and saves her. He brings her to the “Institute”. Nate is nowhere to be found. With the support of the Shadowhunters she has befriended, Tessa has to face reality and realize that people can and will mislead you.

I would recommend this book to people age twelve and older who like action and romance novels. If you have read “The Mortal Instruments” you will love these books.
